

Cassandra Stein

B.Sci (Cons. Biology and Ecology)

Environmental Scientist

SEEC

Strategic Environmental and Engineering Consulting

Cassandra is an Environmental Scientist with experience in wastewater management. She has a firm understanding of domestic and commercial on-site wastewater system design and management, soil assessments and reporting.

Cassandra has a background in flora and ecological monitoring and has translated this into practical applications within the wastewater industry.

Cassandra is one of our Environmental Scientists. She has experience in wastewater management consultancy and design.

Qualifications

- Bachelor of Science (Conservation Biology and Ecology), University of Wollongong, 2025.

Areas of Expertise

- On-Site Wastewater Treatment Systems (Domestic and Commercial)
- On-site wastewater disposal systems design
- AutoCAD drafting

Short Courses

- On-site Wastewater Management Training Course – Centre for Environmental Training 2026

Career Highlights

Environmental Scientist, SEEC; Feb 2026 present.

- Preparation OSWM systems in accordance with Australian Standards, WaterNSW and Silver Book
- Advice on sustainable wastewater management
- Soil assessments and testing
- AutoCAD drafting and design of OWMS
- Report writing

Nelson Lakes Bio Team ranger, Department of Conservation; Feb-March 2025

- Predator trapping and monitoring
- Native species (fauna and flora) monitoring and identification
- Acoustic recorder deployment and analysis
- Weed control and track maintenance
- National data collection and analysis

Production Lead, Wariapendi Native Nursery (Jan 2025 - Feb 2026)

- Species identification
- Large scale production of endangered species for bush regeneration
- Pest and disease management and identification
- Soil testing and management
- Plant maintenance and care
