

Laura Hondroudakis

B.EnvSc (Hons)

Environmental Scientist

SEE C

Strategic Environmental and Engineering Consulting

Laura is an Environmental Scientist with experience in environmental management of construction projects. She has a firm understanding of erosion and sediment control management, environmental monitoring, and reporting.

Laura has a background in soil science and has translated this into practical applications within the construction industry. Laura has worked on a wide range of projects, preparing erosion and sediment control plans (ESCPs), soil and water management plans (SWMPs), Erosion Risk Assessments (ERAs), and conducting inspections of environmental controls.

Laura is one of our Environmental Scientists. She has experience in worksite environmental compliance and monitoring and erosion and sediment control.

Qualifications

- Bachelor of Environmental Science (Honours) (Natural Resource Science), University of Queensland, 2022.

Areas of Expertise

- Construction site environmental management
- Construction site erosion and sediment control
- Development of ESCPs/SEDMPs
- Soil and Water Management Plans
- Project management and client liaison
- GIS
- Environmental field monitoring and compliance

Recent Projects

Melton Level Crossing Removal (2026) – North Western Program Alliance
ESCP preparation and update per changing site conditions.

Watson Street Interchange Upgrade (2026) – Winslow
ESCP Preparation, ESC quarterly site audits.

Mudgeeraba Creek Roadway Upgrade (2026) - Doval Constructions
ESCP Development, site inspections and site environmental representation.

New Central Logan Special School (2025) - FKG Group
ESCP preparation and update per changing site conditions.

Greenwood Road Bridge SWMP (2025) – Murray Constructions
Preparation of Soil and Water Management Plan.

Chermside Bus layover (2025) – Doval Constructions
Site inspections and site environmental representation.

Patpa Drive Sub-division (2024) – ISNA Estate PTY LTD & Craven Securities Pty Ltd
Preparation of Soil Erosion Drainage Management Plan (SEDMP).

Jackson North Wind Farm (2024) – NGH Consulting
Erosion Risk Assessment development.

Beams Road Upgrade Stage 1 A West (2024) – Doval Constructions
Site inspections and site environmental representation.

Broadsound Solar Farm (2024) – Horizon United Group
Preparation of ESCPs for 2 solar farm blocks and sub-station.

Waterworks reserve (2024) – TasWater
Preparation of an Erosion Remediation Report of the management of an environmental incident.

Cressbrook Dam Access Tracks and Waterway Crossings (2024) – Seymour Whyte
Preparation of ESCPs.
