

Paris Chisholm

B.Sc (Environment)

Environmental Scientist

SEEC

Strategic Environmental and Engineering Consulting

Paris is one of our Environmental Scientists. She has experience in onsite wastewater management review and system design and has worked on a range of projects throughout southern NSW.

Paris is an Environmental Scientist with experience in wastewater management. She has a firm understanding of domestic and commercial on-site wastewater system design and management, soil assessments and reporting.

Paris has a background in ecological restoration and project management and has translated this into practical applications within the wastewater industry. Paris has worked on a wide range of projects, including land restoration projects throughout the Illawarra, vegetation management plans, and wastewater site inspections and reporting.

Qualifications

- Bachelor of Science (Environment), University of Wollongong, 2024.

Areas of Expertise

- On-Site Wastewater Treatment Systems (Domestic and Commercial)
- On-site wastewater disposal systems design
- Land Restoration
- Soil Assessments
- Project management and client liaison
- GIS (QGIS)
- Environmental field monitoring and compliance
- AutoCAD Drafting

Career Highlights

Environmental Scientist, SEEC; Apr 2026 to present.

- Preparation of OSWM system designs and reports in accordance with Australian Standards, WaterNSW and Silver Book
- Advice on sustainable wastewater management
- Soil assessments and testing
- Report writing
- AutoCAD drafting
- Client and council liaison
- Budgeting and project management.
